1 INTRODUCTION

1.1 Background

M.H.L. & Associates Ltd. Consulting Engineers has been engaged by Castle Peak Properties Ltd. to prepare a Mobility Management Plan (MMP) to supplement a planning application for a LRD at the site of the former DELL EMC premises, Innishmore, Ballincollig, Co. Cork.

The proposed development will consist of the demolition of the existing former 2 no. storey DELL EMC building (c. 3882 sq m) and ancillary plant area, with associated site clearance works. The proposed development will provide for the 130 no. residential units, arranged in 3 no. blocks in a development ranging in height from 3 to 6 no. storeys.

The development will comprise a mix of 108 no. apartments (total apartment blocks area - c. 10,657 sqm), arranged in 2 no. blocks, providing a unit mix of 52 no. 1-bed and 56 no. 2-bed apartment units. In addition, the proposed development will provide 22 no. duplex units (total duplex block area - c. 2,159 sqm), arranged in 1 no. block, providing a unit mix of 4 no. 1-bed, 9 no. 2-bed, and 9 no. 3 beds.

Vehicular, cyclist and pedestrian access to the proposed development will be via 2 no. entrances from Innishmore Lawn (to the north east) and Mechterstadt Road (to the south west) and the development will include for pedestrian and cyclist permeability. Additionally, pedestrian access points are provided to the west of the subject site and to the south, off Mechterstadt Road.

The development will also include the provision of private, communal and public open space (including all balconies); car parking at ground floor level and undercroft; bicycle parking; internal roads and pathways; bin stores; hard and soft landscaping; boundary treatments; the provision of new surface water and foul drainage pipes and any associated pipe diversion works; retaining walls; changes in level; services provision and related ducting, piping and cabling; electric vehicle charging points; attenuation tanks; SUDS; signage; 1 no. ESB substation; wayfinding structures; public realm works including public lighting; and all site development and excavation works above and below ground.

1.2 Objectives

This Mobility Management Plan has been prepared in accordance with the requirements of the current development plan “Cork City Development Plan 2022 – 2028” which identifies the need for such a study. A Mobility Management Plan is best described as a package of measures put in place to encourage and support sustainable travel patterns amongst the residents of the proposed development. The aim is to reduce the demand and use of the private car and to highlight and facilitate the use of alternative modes of transport. The focus in this instance is:

- To inform residents of the proposed development of alternative modes of travel available to them for their commute journeys.
- To promote healthier, stress-free and cheaper travel options for all development commuters.
- To manage and increase the uptake of public transport options.
- To encourage active travel which includes walking, cycling and scooting.
- To reduce trip generation to and from the site, thus reducing parking demand and traffic generation. Thereby enhancing the environment, improving accessibility, and resulting in economic benefits to building users.

The MMP complies, where applicable, with the principles of “Smarter Travel – A Sustainable Transport Future 2009-2020”. The primary action points have been reviewed and are proposed for the development. This document also references the objectives of the “DTO Advice Note – Mobility Management Plans”. The development of a MMP is an open-ended process whereby the compilation of this Plan is deemed to be the first step in its organic evolution. The plan should be developed by the end user (owner) and regularly reviewed and revised throughout operation. It is recommended that the appointment of an active Mobility Manager either amongst staff members or externally be undertaken as an objective of the Plan. Further detail on the role of the mobility manager can be found in Section 6.2 of this report. To facilitate the necessary modal split in our approach to commuting, residents of the development will be required to embrace the aspirations set out in this document. The complex should actively promote the use of alternative modes of travel through the management of travel plans, and involvement in a Mobility Plan Management. The residents will be encouraged to participate in car-pooling, cycling and walking and using public transport and taxis where practicable.

The Government also has a role to play in changing current commuting practices. The provision of a better public transport system by fast tracking quality bus corridors, the provision of cycle lane facilities and the implementation of tax saver policies on

commuter tickets are just some of the areas where the Government can play their part. There are many examples in other cities and towns around the world where the use of the car is penalised, be it a city centre roads tax or the taxing of car spaces as benefit in kind. Policies such as these may seem dramatic however they do have an overall benefit to the moving of goods and people within the city/town environs. The resulting savings to business and habitants can be significant as congestion and journey times reduce.

Smarter Travel Document "A Sustainable Transport Future" sets out the following aims:

- To support sustainable travel, future population and employment growth will have to predominantly take place in sustainable compact urban areas or rural areas, which discourage dispersed development and long commuting.
- Work-related commuting by car will need to be reduced from a current modal share of 65% to 45%, which will mean that between 500,000 and 600,000 commuters nationally will be encouraged to take means of transport other than by private car driver (of these 200,000 would be existing car drivers). Change in personal behaviour will also be necessary for other travel purposes as most travel relates to non-commuting.
- Car drivers will be accommodated on other modes such as walking, cycling, public transport and car sharing.
- It is also likely that car travel and commuting will be substantially reduced by the growing shift towards remote working. The introduction of remote working and hybrid working legislation by the government is expected to impact work-based travel.

2 EXISTING SITE

The proposed development is situated on the site of the former Dell EMC Building, Innishmore lawn, Ballincollig with the location as shown in Figure 2.1. The site is located in Ballincollig to the west of Cork City Centre, with Cork City suburbs such as Wilton located approximately a 25-minute cycle to the east.

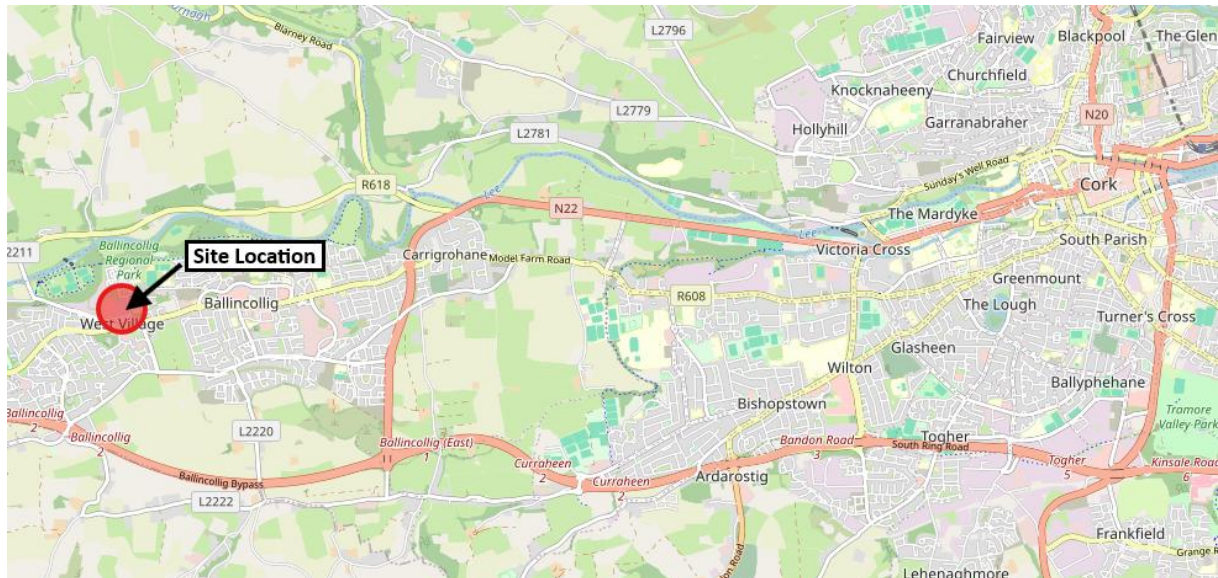

Figure 2.1 Site Location Map

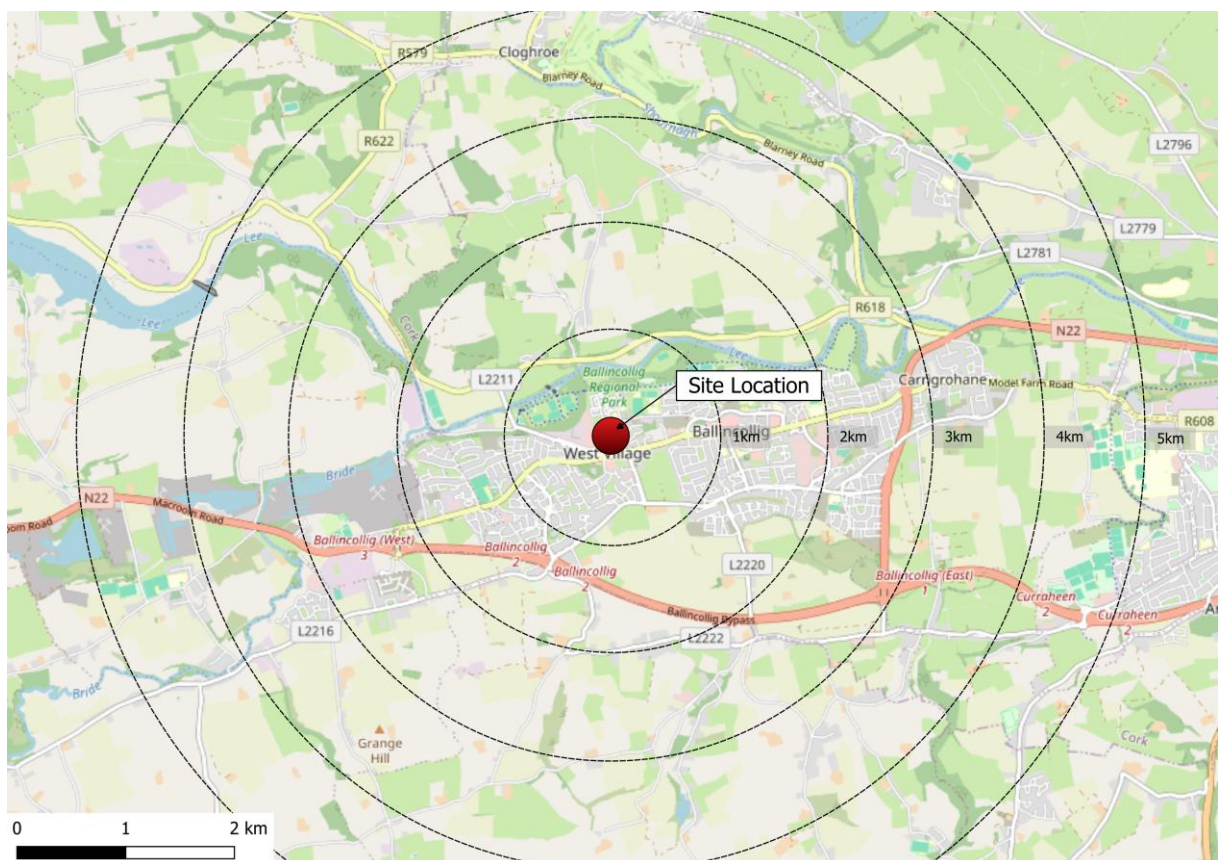

Figure 2.2: 5km Walking Radius of Site

Figure 2.2 highlights a 5km radius for the site location. Walking has been identified as an appropriate mode of transport for trips of 5km or less and while cycling is more suited to trips of over 5km (except where topography poses a significantly limiting factor).

It should be noted that the following schools are within the 2km walking trip radius of the site:

- Ballincollig Community School
- Gaelscoil an Chaisleain
- Scoil Eoin Buachailli
- Le Chéile Secondary School
- Scoil Mhuire Ballincollig

2.1 Existing Public Transport Infrastructure

Existing public bus stops are located approximately a 3-minute walk south of the proposed development on the R608 (Routes 233, 220, 220X). The 220 route runs 24-hours a day Monday to Sunday. The full bus timetables for this route can be found in Appendix A of this report.

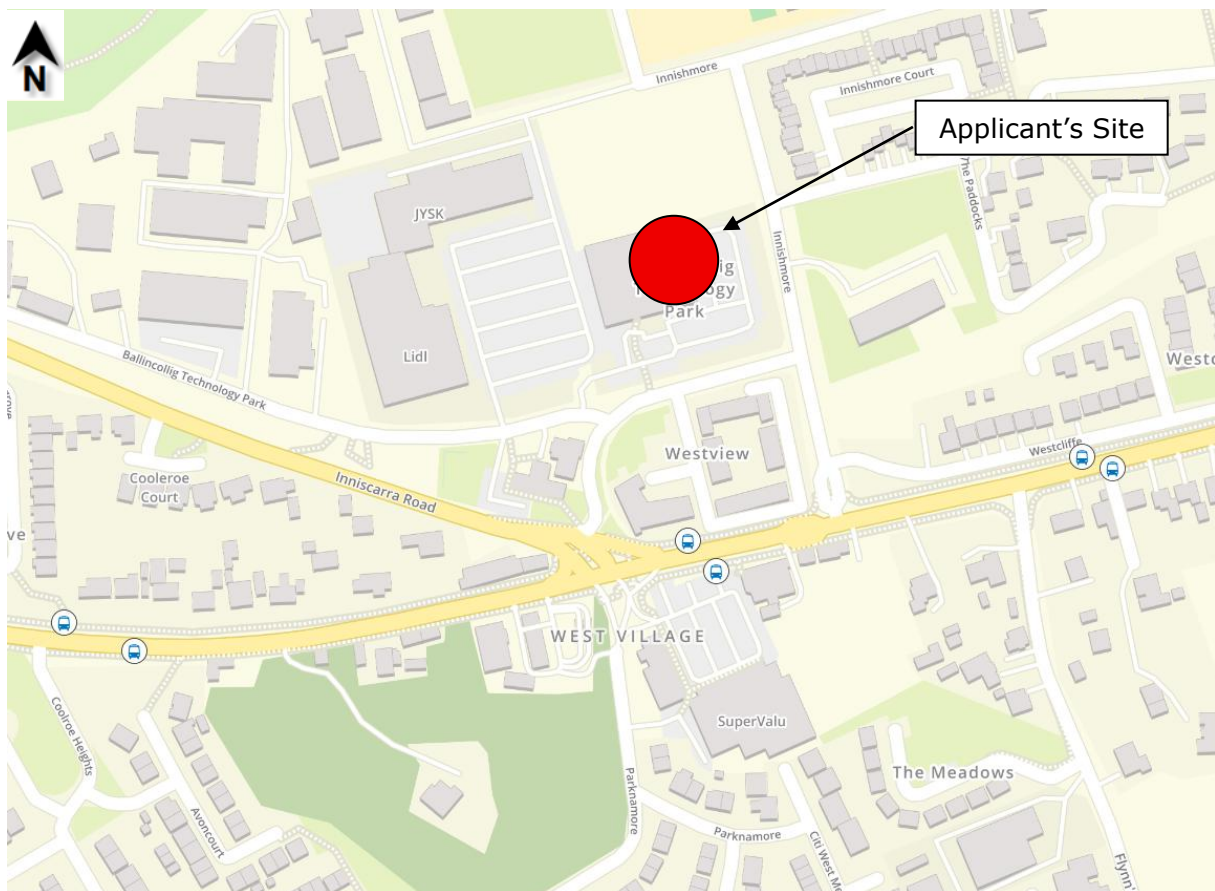

Figure 2.3 Site's proximity to nearby bus stops.

The following bus stops serve bus routes:

- 233
- 220
- 220X

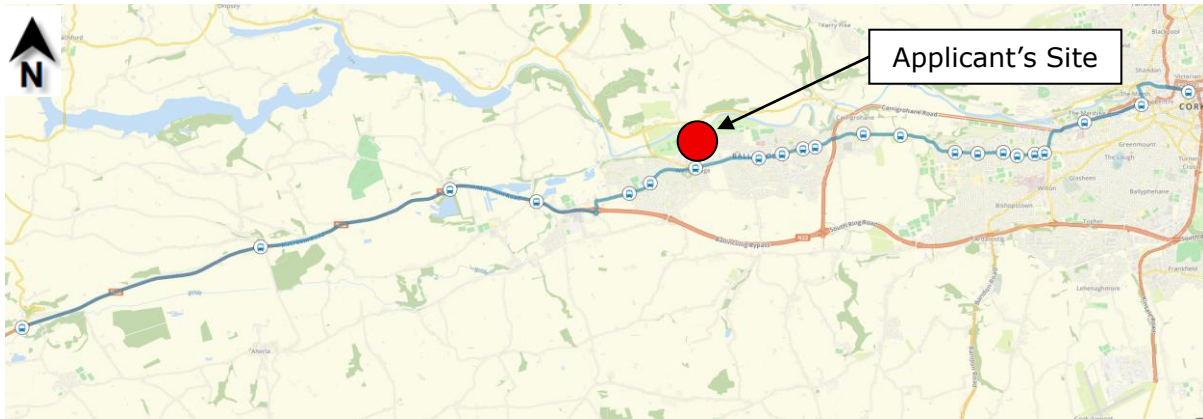

Figure 2.4: 233 Bus Route (source: TFI)

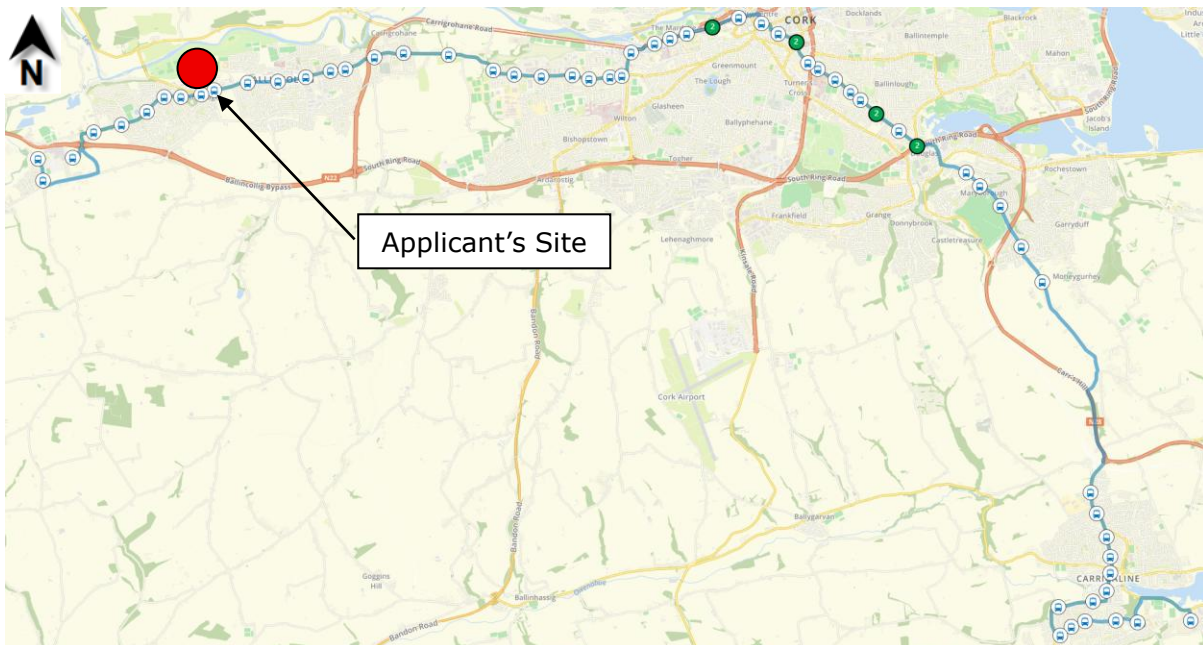

Figure 2.5: 220 Bus Route (source: TFI)

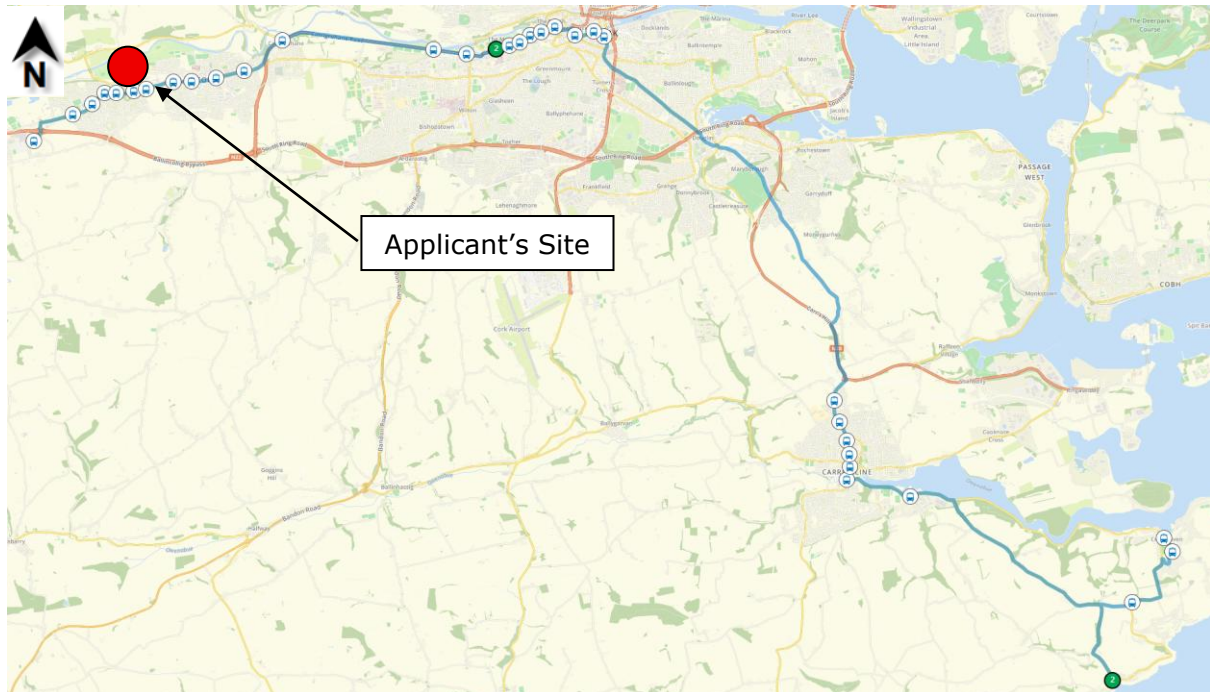

Figure 2.6: 220X Bus Route (source: TFI)

2.2 Existing Pedestrian Facilities

The existing pedestrian facilities surrounding the site are of good quality. All roads in the vicinity of the site have footpaths. There are a good number of amenities within walking distance of the site.

Figure 2.7 below represents the foot travel times in 5-minute intervals from the site. It shows that the majority of Ballincollig can be walked from the site in under 30 minutes.

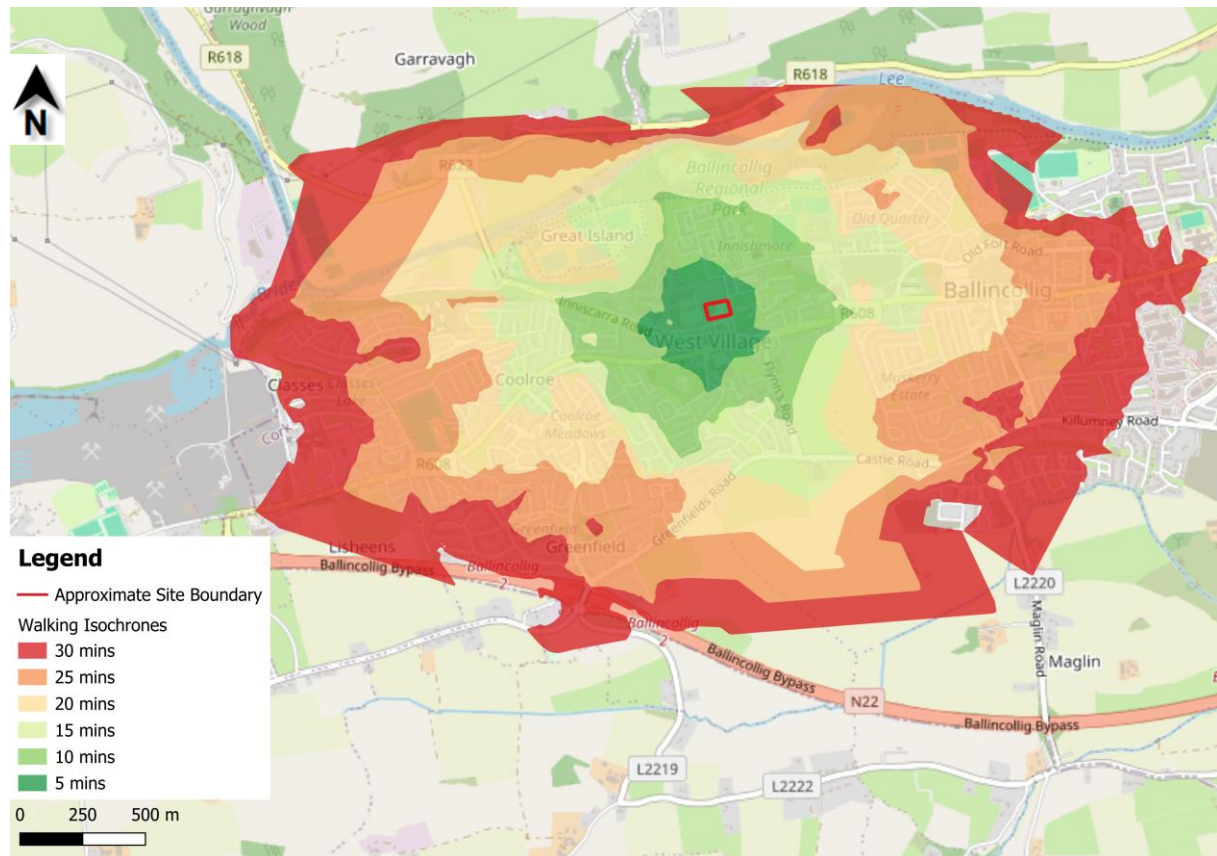

Figure 2.7: Walking Isochrones 5min Intervals (Source: Openstreetmaps)

2.3 Existing Cycle Facilities

Existing cycle facilities are of a decent standard in the area surrounding the development, there is a newly constructed cycle lane running north south on the eastern boundary of the site. This cycle lane connects the junction of the R608 and Innishmore Lawn to Ballincollig Community School. Figure 2.8 shows cycling travel times in 5 min intervals from the development site. It shows that the Cork City centre is located just over a 30-minute cycle from the site.

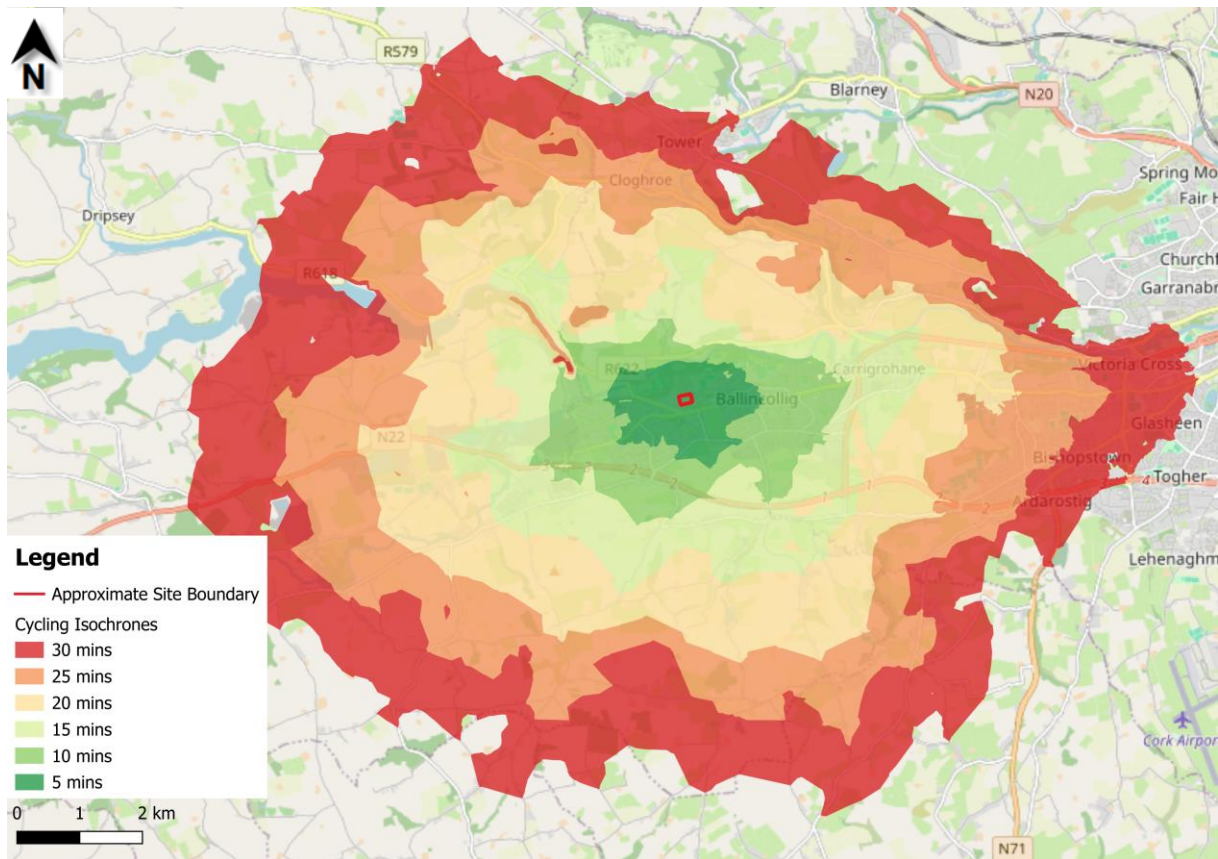

Figure 2.8: Cycling Isochrones 5min Intervals (Source: Openstreetmaps)

3 EXISTING TRAVEL PATTERNS

Data from the 2022 Census was consulted to establish existing travel patterns in the area surrounding the proposed development. To gain an accurate representation of travel patterns in the local area, data from the statistical small areas surrounding the proposed development site were used. The relevant statistical small areas with the proposed development location highlighted can be seen below in Figure 3.1.

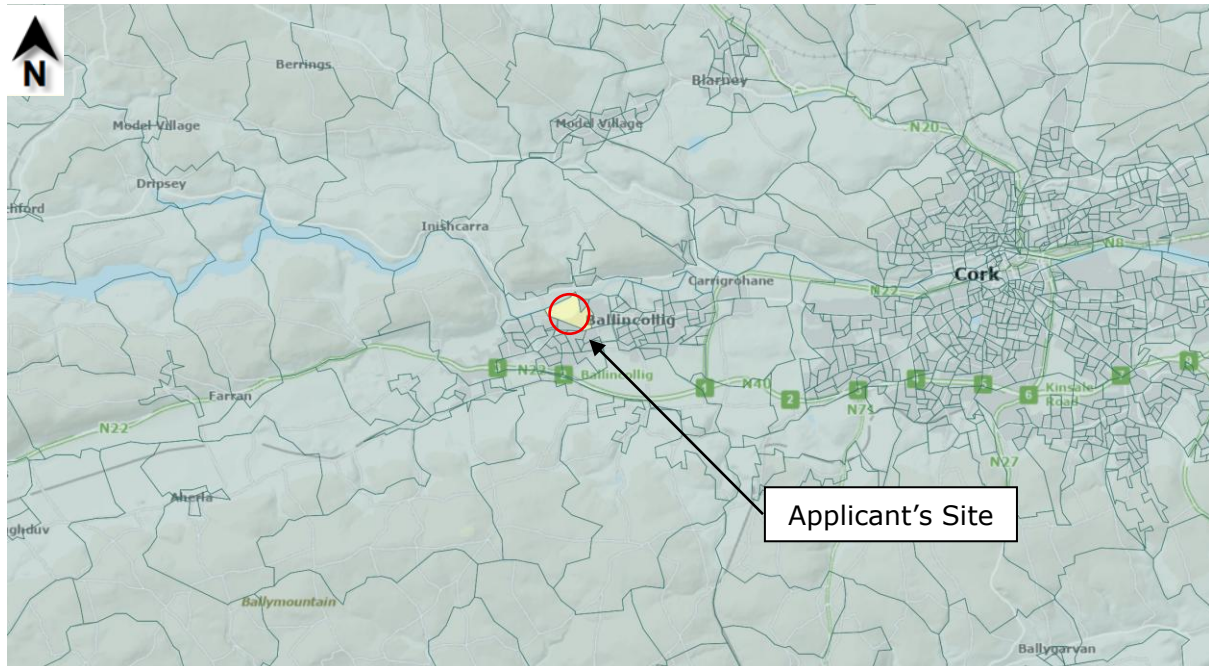

Figure 3.1: Small Statistical Area Surrounding Proposed Development (A047016035)

Means of travel information for the population over five years old is presented in Table 3.1 below. It shows that 32.0% of journeys are made by car drivers, with an additional 24.7% by car passengers. The proportion of people commuting on foot is 29.4%. Travel by bicycle accounts for 0.5%, while public transport use (including bus, minibus or coach) is 8.2%. No recorded use of train, DART or LUAS or motorcycle/scooter is observed in this dataset. Work from home and not stated percentages were removed from the below table to more accurately represent the modes used by commuters.

Means of Travel	Mode Share Number	Mode Share Percentage
On foot	57	29.4
Bicycle	1	0.5
Bus, minibus or coach	16	8.2
Train, DART or LUAS	0	0.0
Motorcycle or scooter	0	0.0
Car (Driver)	62	32.0
Car (Passenger)	48	24.7
Van	9	4.6
Other	1	0.5

Table 3.1: Existing Commuter Patterns

4 TARGET MODAL SHARE

Cork Metropolitan Area Transport Strategy sets out projected mode share percentages for 2040. By 2040 it predicts that 49.3% of morning trips will be via private vehicle with 21%, 25.7% and 4% for walking, bus and cycling respectively.

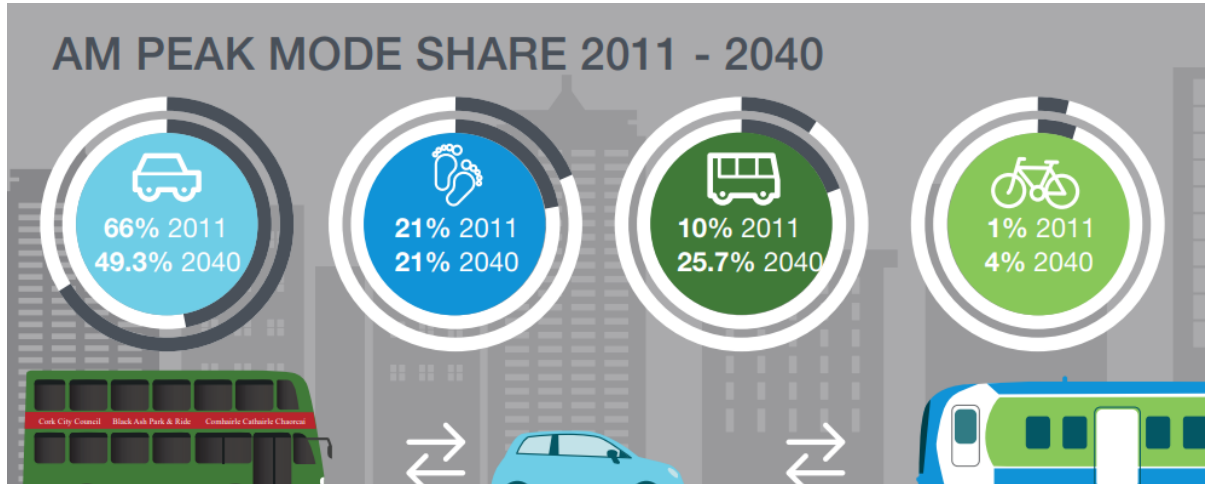

Figure 4.1 Extract from Cork Metropolitan Area Transport Study (CMATS)

The existing data shows that 85.7% of commuters use private vehicles, 2.4% travel on foot, 3.6% travel by bus and 2.4% cycle. The table below shows the increase and decrease in the different modes needed to reach the 2040 targets.

Means of Travel	Mode Share 2022 Census	Target 2040 Mode Share	% Increase / Decrease Needed
Private Vehicle	56.7%	49.3%	-7.4%
On foot	29.4%	21.0%	+8.4%
Bus, minibus or coach	8.2%	25.7%	+17.5%
Bicycle	0.5%	4.0%	+3.5%

Table 4.1 Current and Target Modal Shares

The planned infrastructural improvements outlined in Section 6 of this report will improve the availability of sustainable modes in the area surrounding the proposed development. This will encourage an uptake in the use of public transport and active modes to commute to work and school/college and in turn bring the modal share percentages in the area closer in line with the 2040 target modal share.

5 PROPOSED DEVELOPMENT

5.1 Planning Application

The proposed development will consist of the demolition of the existing former 2 no. storey DELL EMC building (c. 3882 sq m) and ancillary plant area, with associated site clearance works. The proposed development will provide for the 130 no. residential units, arranged in 3 no. blocks in a development ranging in height from 3 to 6 no. storeys.

The development will comprise a mix of 108 no. apartments, arranged in 2 no. blocks, providing a unit mix of 52 no. 1-bed and 56 no. 2-bed apartment units. In addition, the proposed development will provide 22 no. duplex units, arranged in 1 no. block, providing a unit mix of 4 no. 1-bed, 9 no. 2-bed, and 9 no. 3 beds.

Vehicular, cyclist and pedestrian access to the proposed development will be via 2 no. entrances from Innishmore Lawn (to the north east) and Mechterstadt Road (to the south west) and the development will include for pedestrian and cyclist permeability. Additionally, pedestrian access points are provided to the west of the subject site and to the south, off Mechterstadt Road.

The layout of the proposed new development is shown in Figure 5.1:

Figure 5.1: Site Layout Map

The proposed layout of the development is designed to support a shift towards more sustainable modes of transport by prioritising permeability and connectivity throughout the site. Footpaths will run east west through the site with pedestrian connectivity into West City Retail Park directly west of the site. This retail park includes shops such as Jysk, Lidl and Chemist Warehouse. There will be a number of pedestrian entrances into the apartment block from Merchterstadt Road at the south of the site. The existing cycle lane that runs north south on the eastern boundary of the site provides excellent connectivity into Ballincollig. The routes through the site are strategically aligned with natural desire lines. Ensuring that walking and cycling are convenient and attractive options for residents. This integrated approach offers prospective residents flexibility in their travel choices, reducing reliance on private vehicles and enabling a meaningful modal shift towards walking, cycling, and public transport use.

Figure 5.2: Site Layout Map Highlighting Accesses

6 PLANNED INFRASTRUCTURAL IMPROVEMENTS

6.1 Proposed Pedestrian and Cycle Improvements

Cork CycleConnects sets out intended cycle network areas for the Cork Metropolitan Area. A graphic from this plan is shown in Figure 6.1. The existing cycle lane that runs north south on the eastern boundary of the site forms part of a primary route which, when completed, will connect Ballincollig to Cork City Centre.

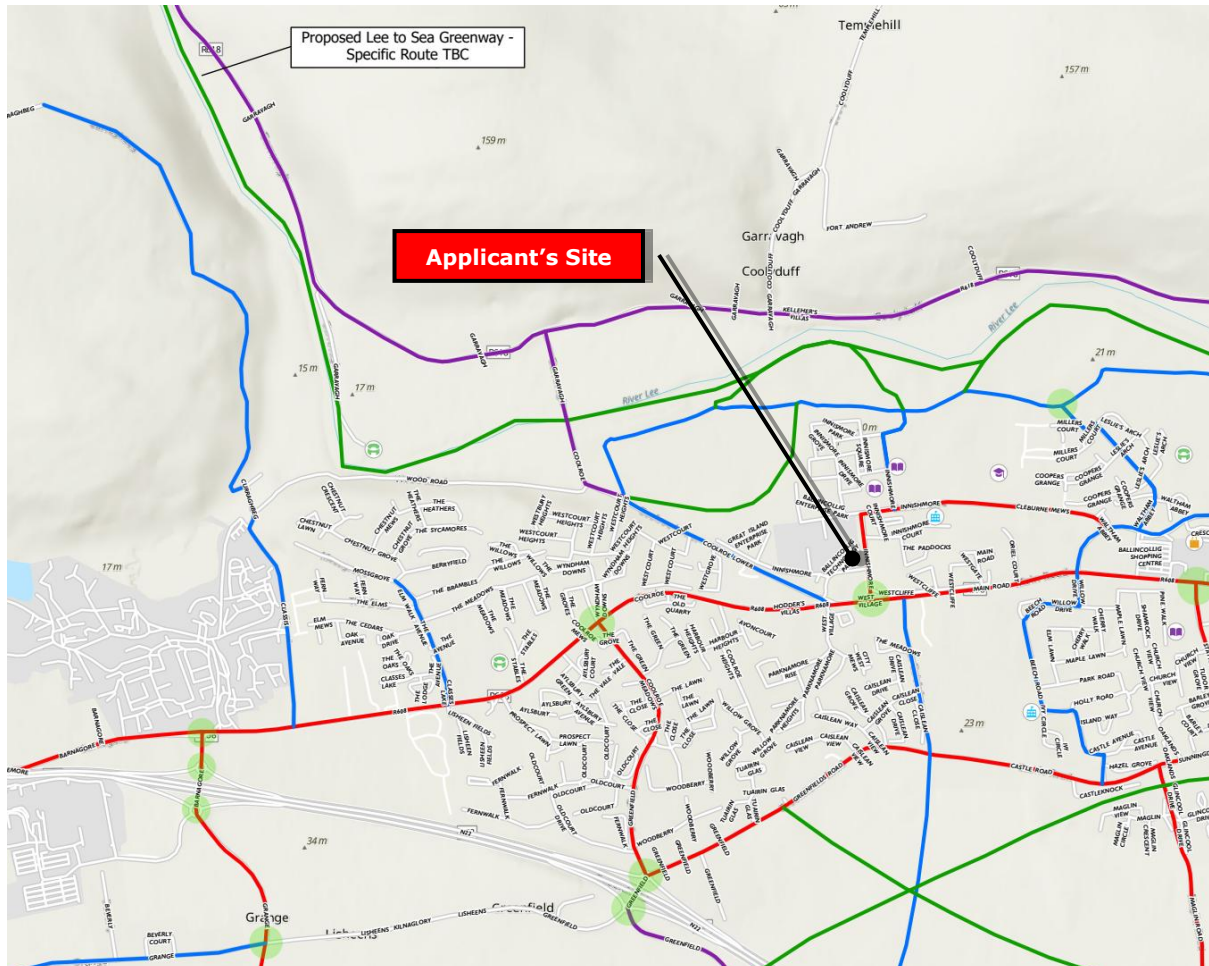

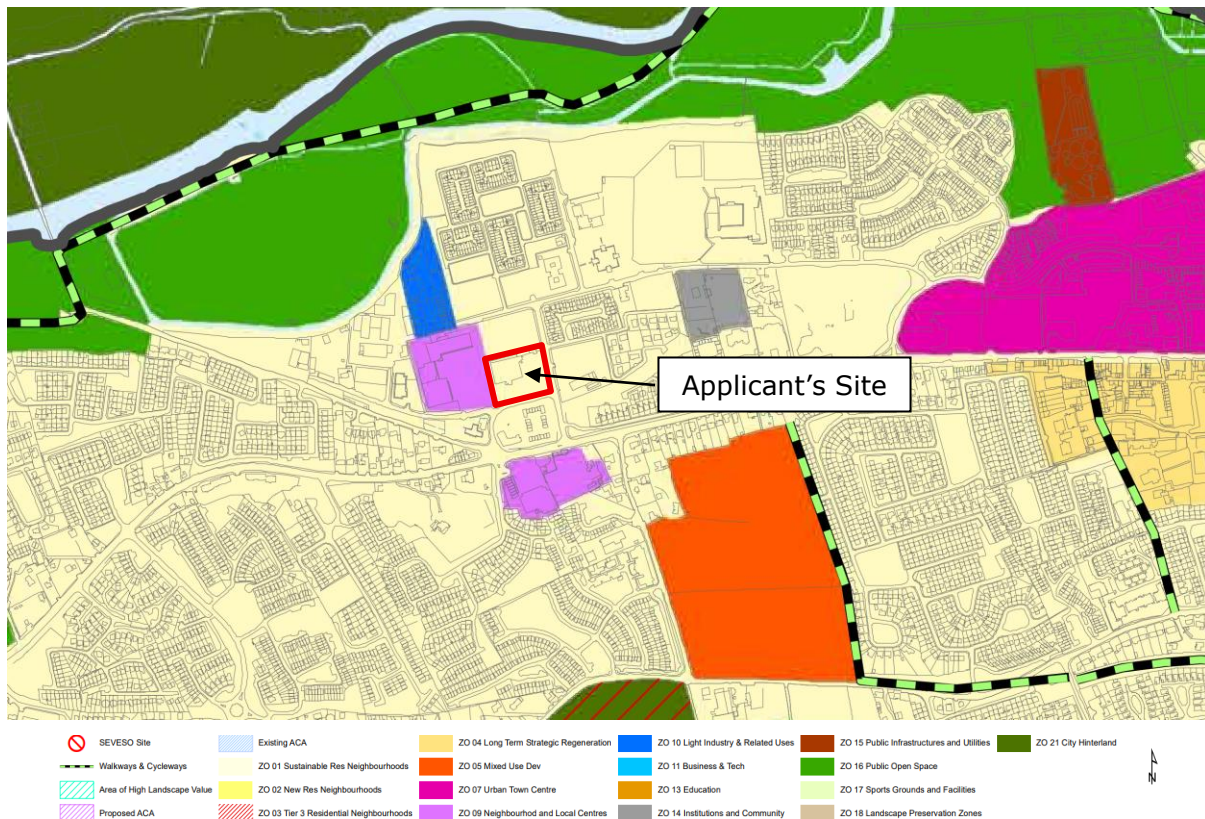

Figure 6.1: Cork CycleConnects in Vicinity of Proposed Development (Source: NTA CycleConnects)

As outlined in the graphic shown above it is proposed to improve cycle network facilities in the vicinity of the site with a proposal to provide the 'Lee to Sea' northwest of the site. This greenway will link Innishcarra to Crosshaven via Cork City, Blackrock, Rochestown, Ringaskiddy and Carrigaline. This facility will present excellent opportunities to future residents to commute by sustainable travel modes.

The NTA BusConnects South West Sustainable Transport Corridor (STC), more specifically Route E – Ballincollig to Cork City, passes right next to the proposed development. This sustainable transport corridor will have bus priority for the majority of the route so that buses can operate efficiently, reliably and punctually, it will also have cycle lanes (segregated were possible) running along both sides of the route. The STC in Cork are planned to be constructed by 2030.

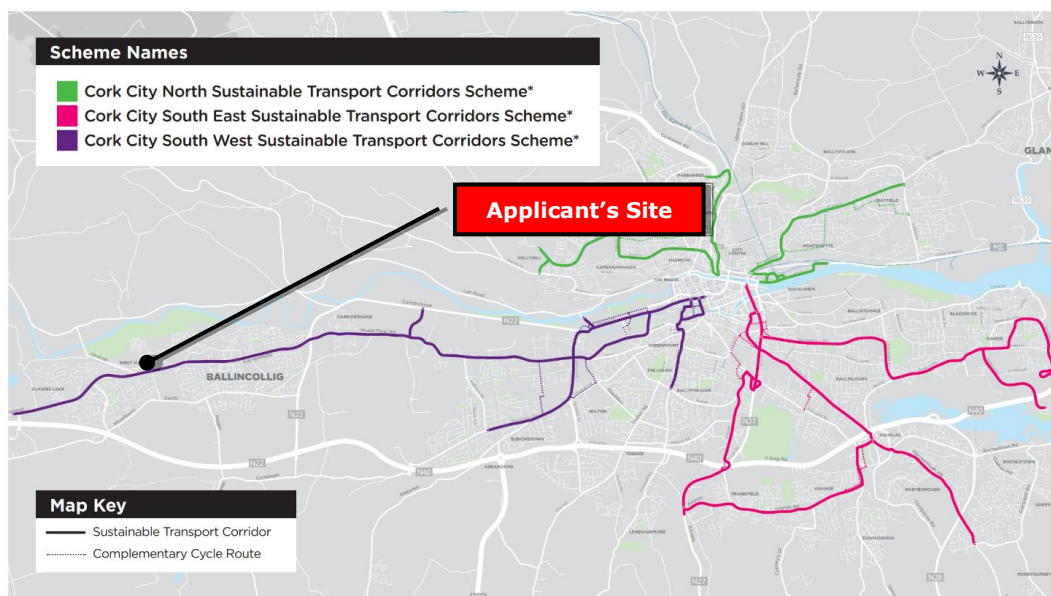

Figure 6.3 Planned Sustainable Transport Corridors for Cork City (Source: NTA BusConnects Sustainable Transport Corridors)

The construction of this STC and the provision of new, and more frequent, bus services will encourage more people to switch to sustainable modes of transport for commuting purposes. Figure 6.4 below shows a map the South West Sustainable Transport Corridor in the vicinity of the proposed development site.

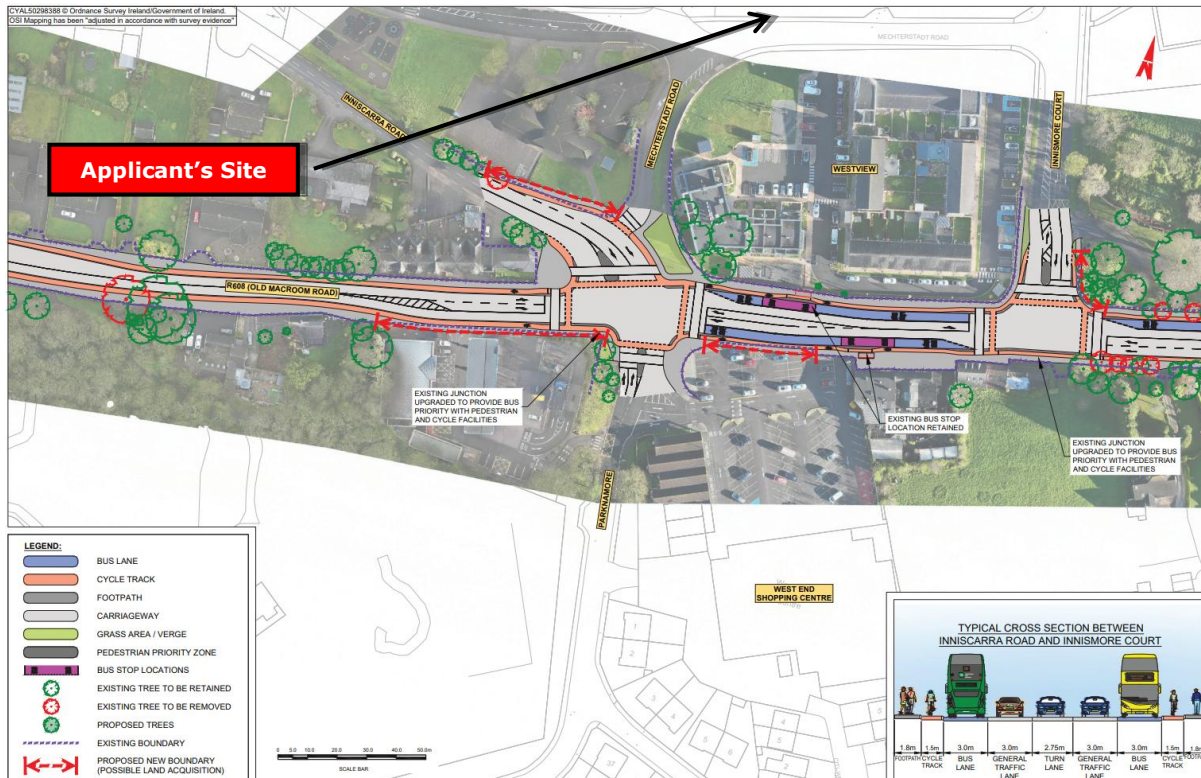

Figure 6.4: Map 7 of Cork City South West Sustainable Transport Corridor (Source: NTA BusConnects South West Sustainable Transport Corridor Drawing)

The National Transport Authority (NTA) has published its final new bus network for Cork. This new bus network will enable more people to avail of public transport resulting in increased access to a greater number of schools and workplaces across Cork City and County.

BusConnects Cork proposes a number of new bus routes in proximity to the proposed development. A map of these routes can be found in Figure 6.5 with the route names in the table below.

Bus No.	Terminal Names	Frequency
1	Model Farm Road (MTU) - College Road (UCC) - St. Patrick's Street - City Hall - Boreenmanna Road - Skehard Road	10min
16	Tower - Blarney - Blackpool Shopping Centre - MacCurtain Street	30min
2B	Curraheen Road - Bishopstown Road - CUH - Western Road - St. Patrick's Street - MacCurtain Street - Old Youghal Road - Boherboy Road	15min

Table 6.1 BusConnects Cork New Routes

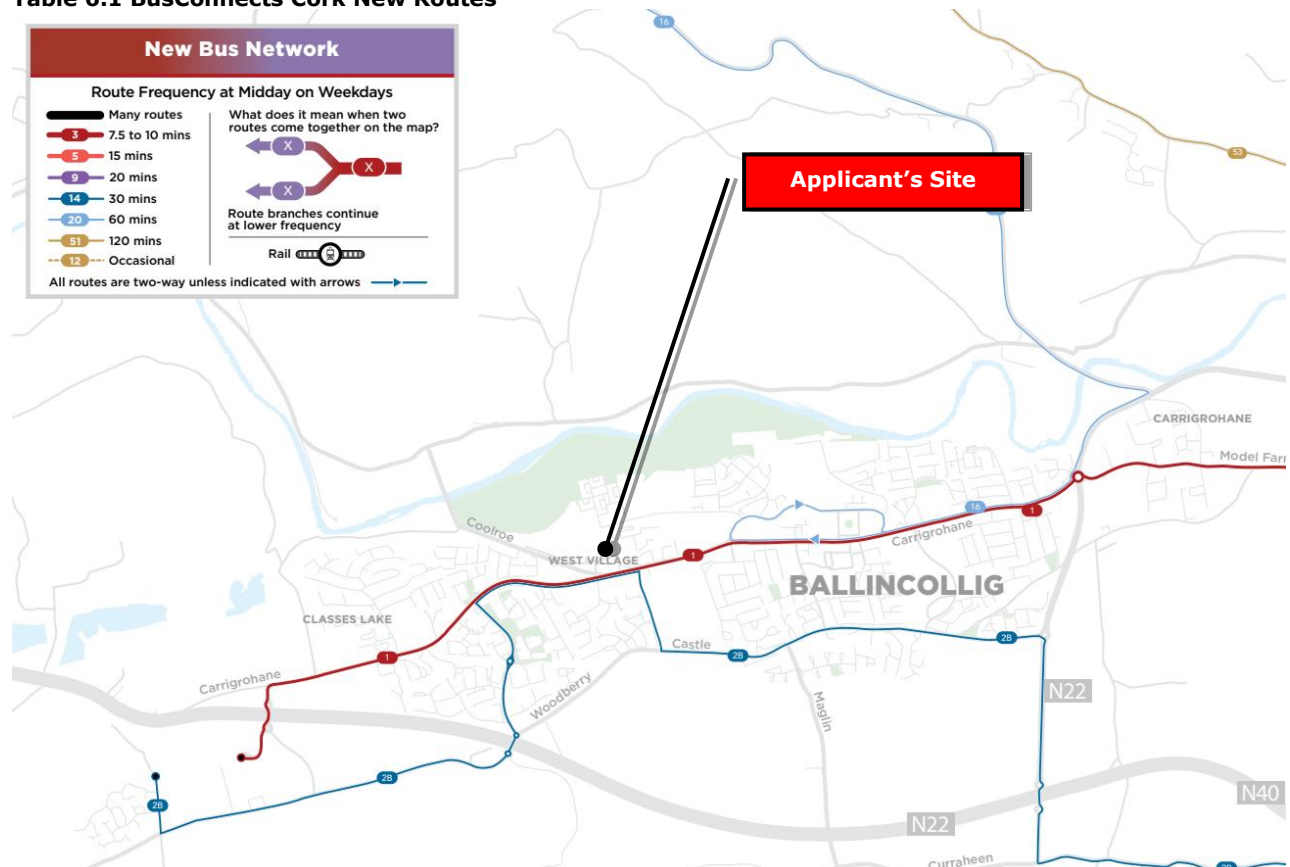

Figure 6.5 BusConnects Cork New Network Map (Source: BusConnects Sustainable Transport Corridor E (STC E), Ballincollig to Cork City)

The Luas Cork is a proposed light rail running from Ballincollig to Mahon Point connecting key locations such as MTU, CUH, UCC, Cork City Centre, Kent Station, Cork Docklands, Blackrock and Mahon. The proposed route starts in Ballincollig with a single-track loop beginning on Station Road.

The proposed development is approximately 1km west of the start of the Cork Luas line, 15-20min walk or 5min cycle. Upon completion, the Cork Luas will provide a reliable and sustainable means of travel into Cork City and on to Mahon from Ballincollig.

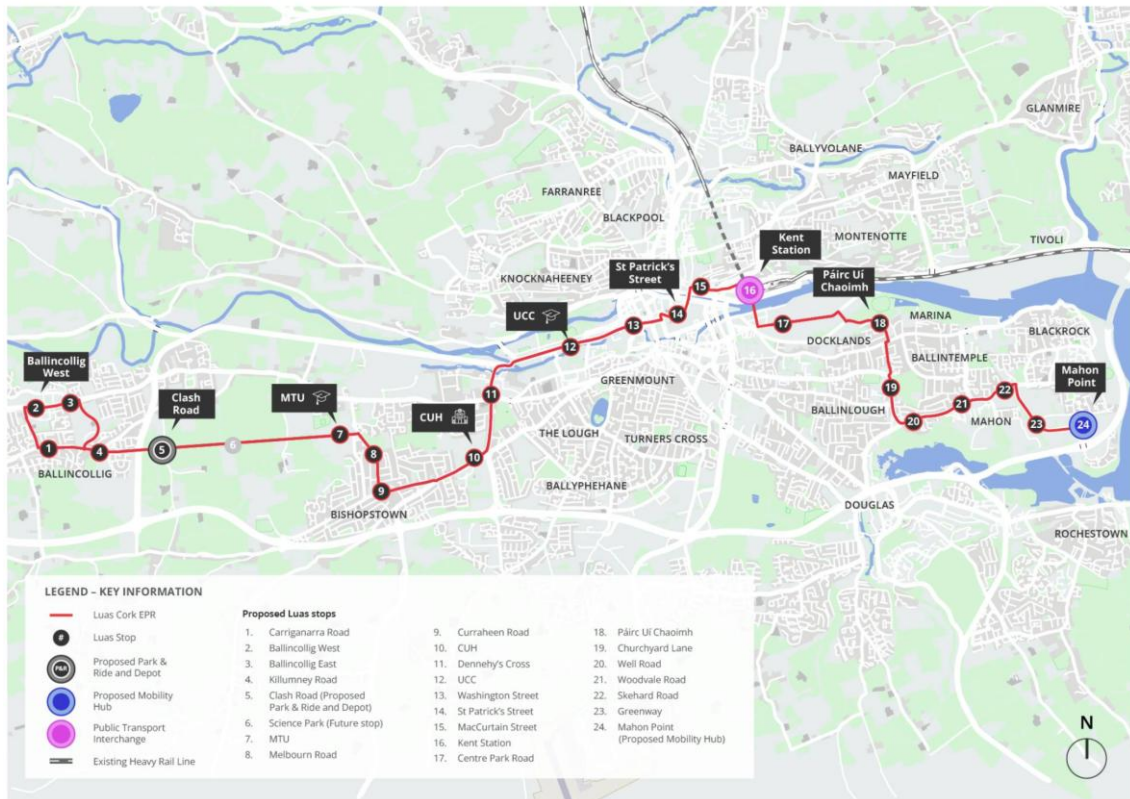

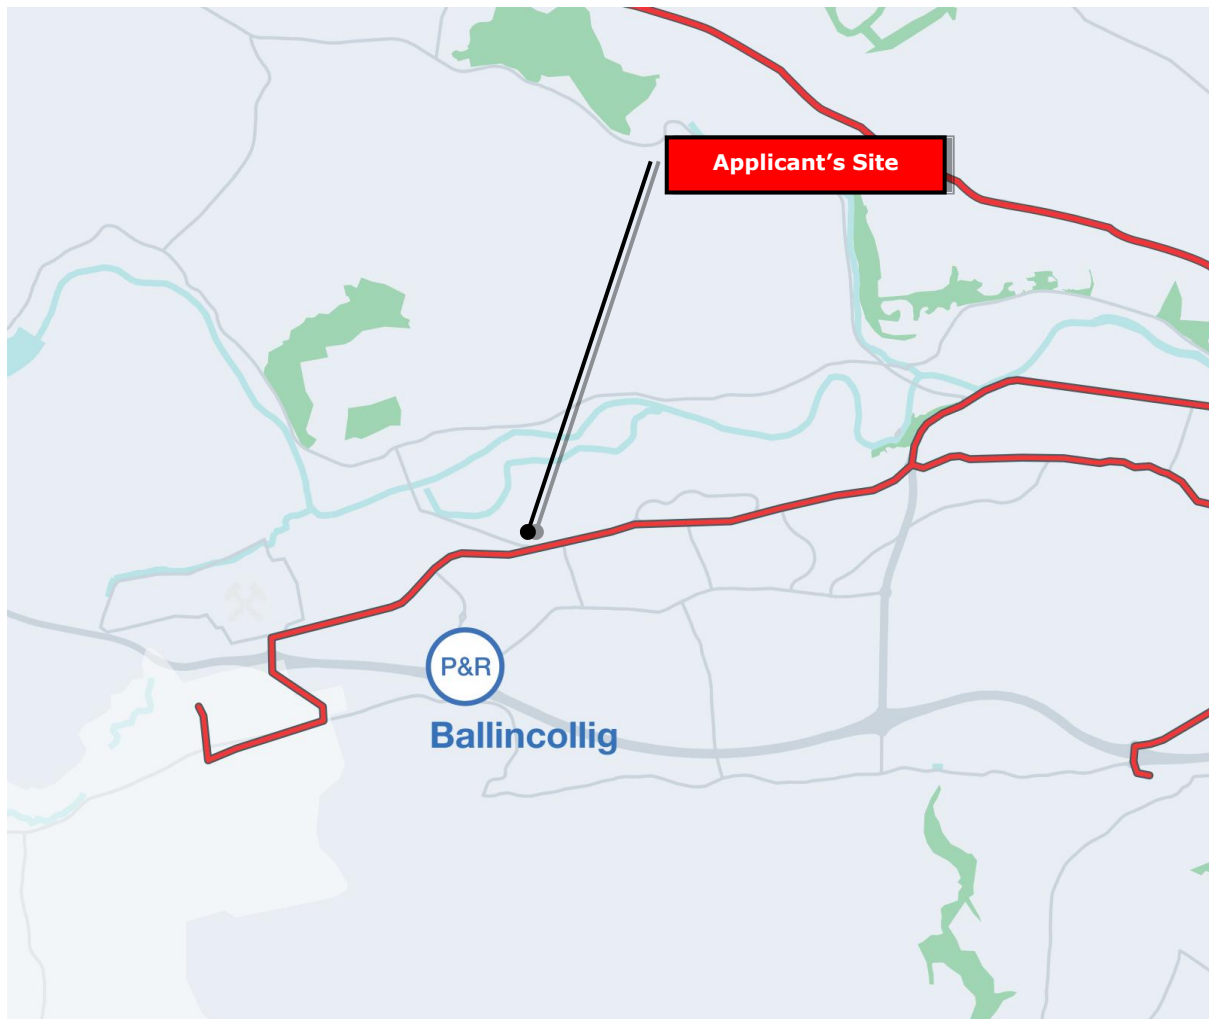

Figure 6.6 Emerging Preferred Cork Luas Route (Source: Luas Cork project website - Emerging Preferred Route Map)

As per the Cork Metropolitan Area Transport Strategy, a number of strategic Park & Ride facilities are proposed for the area. The proposed development is to benefit from the Ballincollig Park & Ride, the approximate location, as shown in CMATs reports, is shown in Figure 6.7. This proposed Park & Ride would provide residents of the development with an alternative mode of travel into Cork City. As part of the emerging preferred Cork Luas route (Figure 6.6) a Park and Ride depot has been shown on Clash Road.

The National Transport Authority has a dedicated Park and Ride Development Office which is finalising the 'Park & Ride Strategic Location Selection: Cork' report. This report will sit under CMATS and will provide further refinement to the Park & Ride locations recommended in CMATS including the Ballincollig P&R.

**Figure 6.7: Site Location in Relation to Proposed Ballincollig Park & Ride Approximate Location
(Source: Cork Met Area Transport Strategy – Indicative Park & Ride Locations Map)**

7 PROPOSED MOBILITY MANAGEMENT INITIATIVES

7.1 Mobility Manager

As previously outlined, it is recommended that the development appoint a Mobility Manager to implement the recommendations of the MMP and to further develop the plan, on an ongoing basis.

The primary task of the Mobility Manager would be to implement measures and initiatives which encourage modal shift to sustainable travel modes and to carry out audits and assessment of travel patterns at regular intervals.

7.2 Role of the Mobility Manager

The role of the Mobility Manager is outlined below:

- Collect and advertise local public transport routes and timetables.
- Liaise with local transport providers.
- Liaise with residents on transport issues and possible improvements.
- Liaise with employers on sustainable travel initiatives and plans.
- Liaise with Cork City Council on sustainable travel initiatives.
- Promote sustainable travel modes, including car-sharing potential.
- Provide educational material regarding sustainable travel to residents.
- Ensure appropriate lockers and safe bike storage facilities are available.

7.3 Local Services and Taxis

The Mobility Manager will provide contact numbers and locations of local taxi ranks as part of its support to residents. Taxis have all the benefits of a drive-share program with the added benefit of giving the user more flexibility on how and when the return trip is made. A reduction in trips particularly during peak hours reduces stress on the roads network as well as fuel consumption and carbon dioxide emissions. Discounts/offers for residents could be negotiated with local taxi ranks/companies.

7.4 Public Transport

The development location is well served by regular bus routes. The proximity of the site to existing bus stops has already been highlighted in this report. The construction of the Cork LUAS will link the development to Kent Train Station. The provision of the planned BusConnects STCs and new routes will provide greater connectivity to Cork City and beyond. The availability of a public transport system like this offers users of the proposed development access to an alternative mode of travel, adding to the future modal shift target objectives.

The mobility management plan would be updated to include for:

- Negotiation of travel-related discounts/offers for residents
- Administration of low-cost monthly/annual tax-saver commuter ticket schemes
- Timetables, routes, and maps
- Journey time indicators
- Advertise real-time apps
- Lobby local authorities and bus providers for late-night bus services and extension of the bike rental schemes.

Government supported programs to encourage people to use public transport include up to a 48% saving on standard pay-over-the-counter charge by means of tax saving schemes.

7.5 Connectivity to Public Transport Hubs

Bus Eireann provides a number of services (which connect the development to Cork City and further afield).

Similarly, Cork City Bus Station provides excellent onward connectivity to destinations countrywide. The "Transport for Ireland" "Journey Planner" and associated App provide information on suggested public transport, walking and cycling route options in urban areas.

7.6 Coordinating and implementing the plan

The role of the Mobility Manager will be to steer the MMP in the right strategic direction and co-ordinate its activities with the rest of the facility. The developing Mobility Management Plan will be required to provide information, services and advice around all aspects of traveling to and from the location. The information provided, possibly included on display boards throughout the development would include advice on travel times, bus timetables and maps, information on local taxi services, details of walking and cycling groups etc.

The manager would also be responsible for negotiating travel related discounts with local service providers (taxi companies), the co-ordination of the various user groups and lobbying of the Local Authority bodies for the improvement of services within the general area.

The successful implementation of the plan will also require the careful and attentive control of parking at the specified locations throughout the development. Parking in inappropriate locations should not be allowed. Parking on the main road, in adjoining properties, on the route of fire-tender or emergency vehicle routes should not be allowed and dealt with appropriately. The effective use of bollards, high kerbs and physical enforcement measures should be applied where necessary.

To be effective in its purpose, the MMP must be kept up to date. Changes to infrastructure such as the provision of cycle lanes, or additional public services coming online all should be reflected in the information being presented to the residents. As previously mentioned, promotion of the alternative modes of transport available should be made on a regular basis.

8 KEY RECOMMENDATIONS

It is necessary that substantial efforts be made to encourage the use of sustainable travel modes and active travel. The quality of pedestrian and cycle facilities, coupled with the level of public transport available to residents of the development means that achieving an appropriate, sustainable modal split is entirely achievable.

The objective of the Mobility Manager will be to encourage sustainable travel modes to achieve the required modal split and improve this quanta year-on-year. To this end the Mobility Manager will review and set targets for increases in the modal share for walking, cycling and bus travel annually. The Mobility Manager's role is a marketing and communications role.

Key site-specific recommendations include:

- Appoint Mobility Manager to further develop and implement the Travel Plan.
- Monitor uptake of bicycle spaces. Ensure security of the spaces is maintained.
- Provide information on CCC Lee to Sea Cycle Route (and other similar projects) to residents.
- Advertise all local bus route timetables.
- Advertise all bus route timetables to and from the development to the surrounding hinterland.
- Provide information on specific travel options and journey times by sustainable modes to various destinations.
- Provide all travel information on noticeboard at reception and at communal areas
- Provide local Taxi company contact details and endeavour to provide standardised, negotiated rates to particular college, city and transport hubs (e.g., train or bus station).
- Provide information on local and national travel initiatives.
- Advertise new cycle, pedestrian and bus route information.
- Liaise with local authority sustainable travel offices and the NTA.
- Liaise with Mobility Managers of local schools and colleges etc.
